## DETAILED ACTION

1. Claims 1-80 are pending.

### *Election/Restrictions*

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-48 and claims 77-80 in part, drawn to methods for diagnosing a subject for a tissue remodelling-associated condition comprising the detection of a high molecular weight enzyme complex, classified in class 435, subclasses 4 and 7.1. Claims 77-80 will be examined with this group to the extent that they read on a method.
  - II. Claims 49-76 and claims 77-80 in part, drawn to kits comprising a reagent for detecting a high molecular weight enzyme complex, classified in class 530, subclasses 350 and 387.1. Claims 77-80 will be examined with this group to the extent that they read on a kit.
3. The inventions are distinct, each from the other because of the following reasons:  
Inventions II and I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product of Group II can be used to detect or isolate a recombinantly produced high molecular weight enzyme complex..  
Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter and because the searches required for the groups are not co-extensive, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4. This application contains claims directed to the following patentably distinct species of the claimed invention: the tissue remodeling associated conditions of cancers of the prostate, bone, hematopoietic cells, nervous system, breast, retina, lung, skin, kidney, liver, pancreas, genito-urinary tract and gastrointestinal tract; arthritis, obstructions (excluding cancerous) and degenerative conditions.

In the event that applicant elects Group I, applicant is required under 35 U.S.C. 121 to elect a single disclosed species of a specific cancer type, arthritis, obstructions or degenerative diseases for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-3, 6-29, 32-48 and 77-80 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karen Canella whose telephone number is (703) 308-8362. The examiner can normally be reached on Monday through Friday from 8:30 am to 6:00 pm. A message may be left on the examiner's voice mail service. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anthony Caputa, can be reached on (703) 308-3995. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0196.
